Sharon just briefed me on the new monitoring schedule. I will get with the water staff so we all are aware of the change.

**Subject:** updated monitoring schedule for FMCV water system

Hello Ivan,

I hope everything is going well in First Mesa. I've updated your monitoring schedule for 2017 and it's attached. Please review it and let me know if you have any questions.

During your last sanitary survey in November, your population served was updated from 2600 to a current population of 3917. This increase triggers a change in your total coliform sample number from **3 to 4 samples per month**. Please identify an additional sample site to collect your fourth monthly routine sample in the upper mesa distribution system. I believe that is the only area of the water system that isn't represented in your current sampling protocol. You should start this additional sampling in March 2017. I spoke with Sharon earlier today to discuss this.

The other change that was triggered by the population increase is in your SOC sampling. Next year when you collect SOC samples, you will need to sample **twice** in different quarters. So you will have to do two rounds of SOC samples next year and the rounds should be taken in two different quarters.

Let me know if you have questions about the changes.

Thanks,

Emmanuelle
